New programme offered to young people

NEET Futures has been working in partnership with Oakmere College and VOLA to deliver the “Moving On” programme for 17 – 19 Year olds in the Wirral area.

The purpose of the programme is to assist NEETs into education, employment or further training by providing them with an opportunity to learn new skills within the framework of Martial Arts and Conflict Management.

Led by professional martial arts instructors with a combined 25 years of experience, the programme offers learners 15 hours per week of physical skills and gaining anatomy, physiology and conflict management knowledge.

With EMA assistance, young people not claiming state benefits can still be entitled to a training allowance.

Any professionals wishing to refer candidates to the programme can contact Rebecca at Rebecca@neet-futures.org.uk or 07889 630 503

Physical Intervention training offered

Physical Intervention training is now being offered at fully accredited Level 2 certification. Physical Intervention training is appropriate for any personnel that may be working in situations where conflict may be an occupational hazard.

The Health and Safety at Work Act 1974 Section 2(1) specifies that employers have a legal duty to provide appropriate training to their staff. Physical Intervention may be required to inform and protect staff from potentially dangerous situations.

New staff start at NEET Futures CIC

Three new members of staff have joined the team to enhance the quality of training offered. As part of our commitment to promoting the talents of unemployed people and our firm believe in practising what we preach two members of the team were long term unemployed! It’s not world changing, but it’s a start.

ITQ Training

Our ITQ training facility is gaining popularity every month with fantastic results. Some of our candidates have achieved their full level 2 qualification within just 2 weeks. With 1:1 tutorials and regular reviews, learners have been very pleased with their results.
